# **Advance Excel Assignment 4**

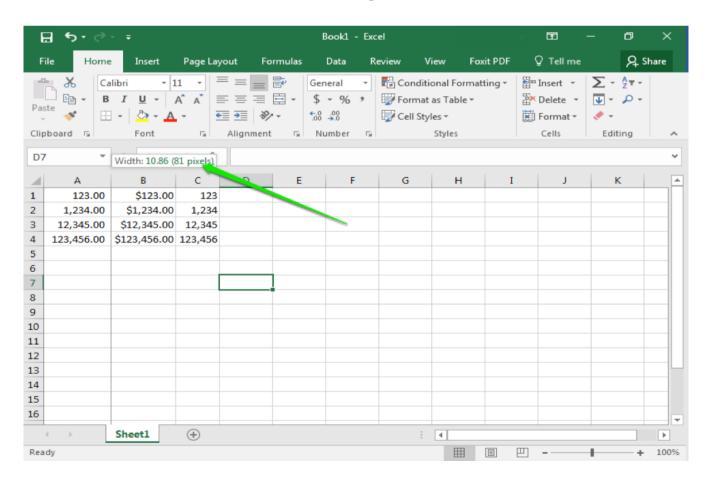

1. To use the ribbon commands, what menu and grouping of commands will you find the Insert and Delete command?

Ans. Following are the tabs in the excel ribbon.

This is the most popular bar and displayed by default when excel is opened. This tab contains the basic Clipboard commands, formatting commands, style commands, commands to insert and delete rows or columns, plus an assortment of worksheet editing commands.

2. If you set a row height or column width to 0 (zero), what happens to the row and column?

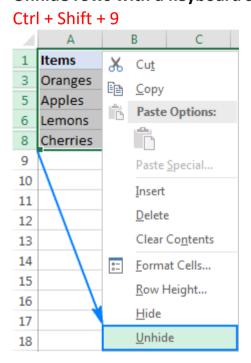

Ans. If you set a row height or column width to 0 (zero), what happens to the row and column? It sets to the default width or height.

- 3. Is there a need to change the height and width in a cell? Why?
  Ans. It is necessary to change width and height in excel to fit the data. Excel by default provide equal width and height with respect to columns and rows. Whenever we enter a lengthy data, few characters will get displayed and other will be present inside the cell but will be hidden to the use
- 4. What is the keyboard shortcut to unhide rows?

  Ans. If you'd rather not take your hands off the keyboard, you can quickly hide the selected row(s) by pressing this shortcut: Ctrl + 9

  Unhide rows with a keyboard shortcut

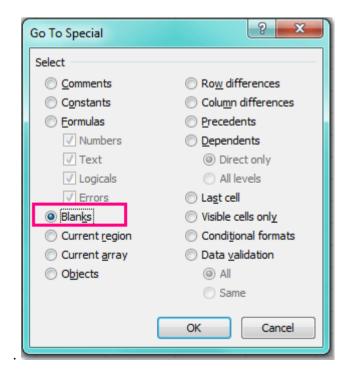

- 5. How to hide rows containing blank cells? Ans.
- A. Select the range that contains empty cells you want to hide.
- B. On the Home tab, in the Editing group, click Find & Select > Go To Special
- C. In the Go To Special dialog box, select the Blanks radio button, and click OK.
- D. Press Ctrl + 9 to hide the corresponding rows

### On the Home tab, in the Editing group, click Find & Select > Go To Special

In the Go To Special dialog box, select the Blanks radio button, and click OK.

.

## All of the blank cells in the selection have been selected
